Lab 1 Instructions: Getting to know jGrasp IDE

- Download two files linked at the bottom of this page: a Java program called *Test.java* and a Java program called *Hello.java*. Save both files to your local folder.
- Run jGRASP
- Open your *Test.java* from jGRASP
- Compile your *Test.java* by clicking on the Green Cross icon on the top of the interface
- Run your *Test.java* by clicking on the Red Running Guy next to the Green Cross icon
- The output of *Test.java* should contain the answer to question 1.

- Open your *Hello.java* from jGRASP
- Compile your *Hello.java* by using the *Build* menu
- Run your *Hello.java* by using the *Build* menu
- The program should output:

```
Hello Student
Welcome to COMSC 110
```

- Change the line `System.out.println("Hello Student");` to say Hello *your first name* by replacing the word "Student" with your first name. For example, I would change the line to `System.out.println("Hello fname lname");//fname and lname are your first and last names respectively`
- Save *Hello.java*
- Compile your *Hello.java*
- Run your *Hello.java*
- The program should output:

```
Hello Your Name
Welcome to COMSC 110
```

- Turn line numbers on by clicking on the icon that looks like a piece of paper with numbers.
- Answer question 2
- Click on the *Interactions* tab in the bottom window
- Type 5342/32
- Answer question 3
- Type 5342.0/32.0
- Answer question 4
- Optional: answer question 5. (Don't worry if you aren't sure. We'll cover this next week.)

- Write your answers on the attached document 3-2: Lab 1 Answers. Submit your 3-2: Lab1 Answers document containing your answers back to Bridges once you finish.
