Instructions:

1. Download *Debugging1.java* linked below.
2. Correct all the errors and make sure the program has the appropriate documentation and is formatted correctly. Your program output should look like:

```
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
!! This program used to have lots of problems, !!
!! but if it prints this, you fixed them all.  !!
!! Hurray!                                     !!
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
```

3. Modify the header documentation to match the format we had during the lecture: author, date, description etc.
4. Save the file into a new java file with name ***Debugging1_fname_lname.java,*** *where fname and lname are your first and last names.* For example, if a student's name was Jane Doe, the file should be named *Debugging1_Jane_Doe.java.*
